

ELYS.

The
essence
of light.

The essence of light.

ELYS - The essence of light

Introduction.

ELYS. - THE ESSENCE OF LIGHT

As an architectural lighting designer, you know how to make a big impact on the atmosphere of any space. Meanwhile, you have to navigate within the set boundaries of a project; the vision of the (interior) architect, the function of the building, sustainability goals and of course: the budget. It almost seems impossible to meet all requirements.

With Elys you don't have to compromise. You can have both quality and design while staying within your budget. Elys is here to tie it all together.

Our story.

Premium design

The refined design of the Elys portfolio gives every space a high-end finishing touch. The range of different sizes, materials, finishes and colours allow you to perfectly match the style of each space.

Optimal light quality

Elys uses LED chips of only the best quality. Its unique LumiCross Lens Technology offers a low glare. And with a standard Colour Rendering Index of >98Ra, colours will look exactly like the architect envisioned.

No compromising

At Elys, you can get all of the above without having to break the bank. Great quality, design and flexibility, within an affordable price range.

ELYS.

The
essence
of light.

Our vision.

MADE IN HOLLAND

We're lighting manufacturers with a strong grasp of both design and technical aspects. What sets us apart is our ability to blend the right luminaire, LED module, light output, colour, and focal point seamlessly. With all the expertise and craftsmanship under one roof, we specialize in turning ideas into unique luminaires. Every ELYS. luminaire is assembled in the Netherlands, allowing us to maintain control over the production, ensuring flexibility and a commitment to high quality and craftsmanship.

MODULAR & CIRCULAR

As well as being aware of its environmental impact, ELYS. is at the forefront of environmentally friendly production of its high quality luminaires. The use of alternative energy sources and the recycling of raw materials is a matter of course. ELYS. focuses on prolonging the life of the product, optimising efficiency and the modular design, which makes it possible to create a completely new look with an existing module by simply replacing the front ring with a different colour or model. You can easily switch the housing. A broken component? Keep the housing and replace only the broken part.

The essence of detail.

At ELYS, we believe that true elegance lies in the details. Every fixture we create embodies our commitment to pure craftsmanship, blending the finest materials into a timeless design to illuminate your space with refinement.

Our dedication to quality begins with the selection of materials. We source only the best materials to ensure our luminaires are crafted from premium metals, ensuring that every component is selected for its durability and aesthetic appeal.

Regardless of which finish you choose, every ELYS fixture represents pure Dutch craftsmanship with precision and attention to detail. From the initial design to the final inspection, each step in the process is carried out with meticulous care from our manufacturing office in The Netherlands. Ensuring that each product is assembled to uphold the highest standards.

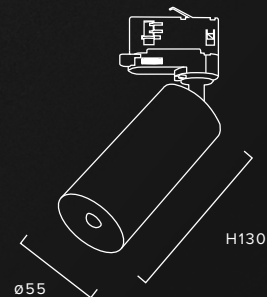

ELYS - The essence of light

Track luminaires.

Introducing the Track luminaires, designed for versatility and precision. These sleek, cylindrical fixtures feature an elegant housing, offering a clean and modern look. Ideal for both residential and commercial spaces, they provide flexible light direction, perfect for highlighting areas or focused task lighting. With their high-quality build and contemporary design, they effortlessly blend into any setting, combining functionality with style. A perfect choice for any modern lighting scheme.

Altera TR.

Luminaire with sleek curved lines designed for 1-circuit and 3-circuit track systems, offering both elegance and functionality. Its adjustable adapter allows for precise beam positioning, for crafting the perfect ambiance in any décor. Enhanced by advanced LumiCross Lens technology, this luminaire delivers high-quality illumination with minimal glare and optimized visual comfort.

LumiCross Lens Technology.

ELYS. utilizes a special lens technology that emits light in a cross-linked pattern. This unique feature allows us to design our luminaires with very small openings and minimal light loss. An important additional advantage is the very low Unified Glare Rating (UGR), which ensures that the light is perceived as highly comfortable, seamlessly blending the luminaire into the surrounding space.

With ELYS., you not only experience efficient lighting but also enjoy enhanced comfort and aesthetics, making your environment more inviting and pleasant.

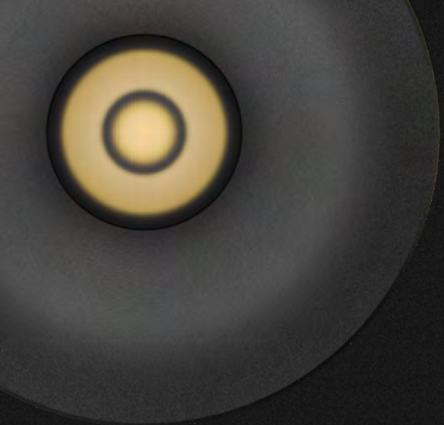

ELYS - The essence of light

Surface mounted luminaires.

Introducing the Surface Mounted Luminaires, a versatile addition to the Eterna and Altera family, offering the same elegance and functionality in a convenient surface-mounted version. Crafted with precision engineering, these fixtures features the sleek curved lines and subtle finishes that define the Curved series.

With its unique seamless design, the Surface Mounted Luminaires brings sophistication to any space, providing exceptional illumination while integrating into any environment. Experience the perfect balance of style and practicality with the Eterna Surface, where innovation meets convenience in lighting design.

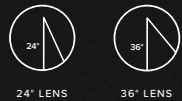

Eterna SF.

Surface mounted luminaire featuring sleek curved lines offering elegance and functionality in one compact design. Crafted from a single piece, featuring an internal driver and invisible mounting design for seamless integration. The advanced LumiCross Lens technology minimizes glare while providing exceptional visual comfort.
